

Brief Bio

David M. Bittlingmeier

David has over 10 years in Strategic Enterprise Security, Designing, Developing and Implementing various Enterprise Policies and Procedures, Enterprise-wide Security Awareness Training, Business Continuity, Project Management, and Technical Consultation experience where he has provided professional judgments and advice to all levels of management. Has personally conducted numerous security reviews (Companies Confidential) for various financial organization's "lines of business" service providers insuring their compliance with Industry Best Practices, Business Continuity, Disaster Recovery Planning, ISO 17799 and NIST standards based on OCC/Basel II/BITS regulation.

As a consultant, he has offered Enterprise Security Management perspective for executives seeking an unbiased source of education, insight and expertise in order to ensure the success of their business including yet not limited to:

- Various outsourced IT application development and maintenance vendor assessments
- Repeatable and sustainable processes for assessing 3rd Party Enterprise Risk Assessment Methodology based on OCC/Basel II/BITS regulation and ISO 17799 standards
- Building liaison with & designing security training for Business Units, HR, & Internal Audit
- Developing Enterprise-wide Security Policies and Procedures

As a senior member of Security Departments, paved the path for continuous improvement by developing a systematic process for assessing and mitigating probable adverse conditions or events while focusing on delivering results and implementing preventative actions as well as developing Corporate Policies and Procedures. He has worked with Internal Audit, HR and Legal in uncovering and documenting crimes and abuse while pro-actively moving these departments towards self-reliance. Individually uncovered, documented & identified consultants from major banks sending inappropriate items to consultants at agency who then forwarded them on to others located in the US and overseas and then hired and managed the professional forensic REACT team.

In addition, he has consulted with (ISC)2, preparing security professionals for the CISSP exam and then as Proctor Supervisor for ISC2 CISSP certification exam, wrote Strategic Security Plan for one of the major departments of the State of California within the State Administrative Manual (SAM) and the State Information Management Manual (SIMM) mandates as well as Industry Best Practices, speaks at International Enterprise Security Conferences, an on-going attendee of the U.S. Secret Service San Francisco Electronic Crimes Task Force, contributor of Risk Analysis: 1st Step in HIPAA Security Publication, as well as a member of the High Technology Crime Investigation Association, Inc. David has received praise for his ability to explain complexity in lay terms from various sources such as San Francisco Mayor's Criminal Justice Council, California Youth Authority and others.

Spent over ten weeks traveling in India and China, conducting due-diligence reviews of financial services offshore IT service providers, IC manufacturing and other functional areas (compliance issues in general and specifically reviewing outsourced and/or offshore service in India and China).
