

# Brief Bio

## David M. Bittlingmeier, BA, MS, CISSP, CRM

CISSP (Certified Information Systems Security Professional) - CRM (Certified in Risk Management)

David's focus is in Strategic Enterprise Security; Designing, Developing and Implementing various Enterprise Policies and Procedures, Disaster Recovery Planning, Enterprise-wide Security Awareness Training, Business Continuity, Project Management, and Technical Consultation. He has provided professional judgments and advice to all levels of management. Has personally preformed numerous local, national, and international due-diligence security reviews, (Companies Confidential) for various organizations as well as their "lines of business" and/or service providers insuring their compliance with Industry Best Practices based on ISO 17799/27002, NIST standards, and OCC/Basel II/BITS regulation, including, yet not necessarily limited to, third-party service companies, mail services, various outsourcing functions/processes, venture capitalist projects, insurance companies, financial companies, functional areas, etc. ranging from multi-million to multi-billion dollar organizations (compliance issues in general and specifically reviewing outsourced and/or offshore service in U.S., India, and China).

In addition, publications contributor; 2nd Edition: Modeling Risk (Wiley), Security+ Training Guide (Que) and Risk Analysis: 1st Step in HIPAA Security, he has consulted with (ISC)2, preparing security professionals for the CISSP exam as well as Supervisor of the exams, wrote Strategic Security Plan for one of the major departments of the State of California within the State Administrative Manual (SAM) and the State Information Management Manual (SIMM) mandates as well as Industry Best Practices, speaks at International Enterprise Security Conferences, an on-going attendee of the U.S. Secret Service SF Electronic Crimes Task Force, as well as a member of the High Technology Crime Investigation Association, Inc. David has received praise for his ability to explain complexity in lay terms from various sources such as San Francisco Mayor's Criminal Justice Council, California Youth Authority and others.

As a consultant, he has offered Enterprise Security Management perspective for executives seeking an unbiased source of education, insight and expertise in order to ensure the success of their business including yet not limited to:

- Repeatable and sustainable processes for assessing both in-house and 3rd Party Enterprise Risk Assessment Methodology based on OCC/Basel II/BITS regulation and ISO 17799/27002 standards
- Building liaison with & designing security training for Business Units, HR, & Internal Audit
- Developing Enterprise-wide Security Policies and Procedures with ongoing assessment
- Designing and developing various Security Awareness Programs and Training

As a senior member of Security Departments, paved the path for continuous improvement by developing a systematic process for assessing and mitigating probable adverse conditions or events while focusing on delivering results and implementing preventative actions as well as developing Corporate Policies and Procedures. He has worked with Internal Audit, HR and Legal in uncovering and documenting crimes and abuse while pro-actively moving these departments towards self-reliance. Individually uncovered, documented & identified consultants from major banks sending inappropriate items to consultants at agency who then forwarded them on to others located in the US and overseas and then hired and managed the professional forensic REACT team.
